## I. BACKGROUND

Tirupati District has been witnessing a persistent threat from ganja peddling and other NDPS related offences, which are adversely affecting public order, youth, students, workers, pilgrims, and the overall law and order environment in the district. The illegal trafficking and consumption of ganja has gradually evolved into an organized criminal activity involving interstate suppliers, local peddlers, consumers, transporters, financiers, and habitual offenders.

Analysis of crime data reveals that during the last 10 years, a total of 358 NDPS cases were registered in Tirupati District against 1323 accused persons. Out of them, 1187 accused were arrested, while 116 accused are still absconding and yet to be arrested. The data clearly indicates the existence of an extensive network of peddlers and habitual offenders operating within the district.

| No. | Year         | No of cases | No of accused arrested | No of accused yet to be arrest | Total       |
|-----|--------------|-------------|------------------------|--------------------------------|-------------|
| 1   | 2016         | 2           | 19                     | 3                              | 22          |
| 2   | 2017         | 6           | 15                     | 1                              | 16          |
| 3   | 2018         | 13          | 72                     | 7                              | 79          |
| 4   | 2019         | 18          | 60                     | 7                              | 67          |
| 5   | 2020         | 16          | 47                     | 2                              | 49          |
| 6   | 2021         | 47          | 137                    | 8                              | 145         |
| 7   | 2022         | 34          | 118                    | 6                              | 124         |
| 8   | 2023         | 46          | 235                    | 26                             | 231         |
| 9   | 2024         | 85          | 248                    | 50                             | 298         |
| 10  | 2025         | 65          | 169                    | 39                             | 208         |
| 11  | 2026         | 26          | 67                     | 17                             | 84          |
|     | <b>Total</b> | <b>358</b>  | <b>1187</b>            | <b>166</b>                     | <b>1323</b> |

The growing availability of ganja among youth and vulnerable sections is leading to increased addiction, property offences, violent crimes, financial distress, and other social problems. Hence, continuous

surveillance, intelligence collection, preventive policing, and strict enforcement are essential for effective control of NDPS related activities.

The problem is no longer limited to isolated peddling. It has evolved into a structured illegal network involving:

- Interstate supply chains
- Local peddlers and habitual offenders
- Student and youth targeting
- Courier/parcel-based transportation
- Concealed storage in rented premises and lodges
- Use of digital payments and mobile communication
- Repeated involvement of known offenders and criminal associates

This has resulted in rising ganja consumption among youth and students. Increased petty crimes, thefts, violence, and addiction-linked offences, organized criminal activity, interstate drug movement, threat to public order, educational institutions, and pilgrim safety.

In view of the above, Tirupati District Police shall adopt a multi-dimensional Anti-Ganja Strategy integrating preventive policing, intelligence-led enforcement, technical surveillance, offender profiling, predictive policing, and digital monitoring to identify, disrupt, and dismantle ganja networks in the district.

## **II. STEPS TO BE TAKEN TO CONTROL GANJA MENACE**

### **A. PREVENTIVE MEASURES :-**

Preventive action is the first line of defence to reduce ganja demand, identify vulnerable groups, and deny operational space for peddlers. Key Preventive Measures includes....

1. Identification of Vulnerable Areas (Mapping of ganja-prone areas such as:)

- Urban slums and labour colonies
- Isolated public places
- Closed mills, godowns, factories, poultry sheds and farm houses
- Bus stands, railway stations
- Lodges and rental clusters
- Educational institutions
- Hostels and PG accommodations

2. Conduct Awareness campaigns (for Youth & Student Outreach in):

- Schools
- Colleges
- Universities
- Coaching centres
- Hostels

During awareness programmes, focus on “Health impact of Ganja, Legal consequences, Early warning signs & Reporting suspicious activity”.

3. Awareness to Parents & Institutions:-

Parents, teachers, and hostel wardens to be sensitized on:

- Behavioural changes
- Drug indicators
- Reporting mechanism

4. Community Policing and Engagement programme, involve :

- Ward/Village Secretariats
- Volunteers
- Hostel owners
- Educational managements
- Auto/Taxi unions
- Courier operators

## 5. Regular enforcement drives :

### Enforcement Mechanism:

#### 1.Intelligence Collection by Developing Informer Network:-

A strong informer network is the backbone of anti-ganja operations.

##### A. Sources to be developed:

- Auto drivers
- Railway vendors
- Parcel handlers
- Hostel staff
- Lodge staff
- Students
- Local informants
- Habitual rowdies
- Community volunteers
- Delivery workers

##### B. Inputs to be collected:

- New peddlers
- Suspicious movement
- New consumers
- Storage points
- Supply routes
- Courier transport

#### 2.Informer Development Strategy

- Identify reliable local sources
- Develop beat-level confidential informers
- Use category-wise informers
- Maintain informer secrecy
- Verify input before action
- Incentivize credible information

#### 3.Surprise Checks on Trains, Buses, Parcel & Courier Services

##### A. Special surprise checks shall be conducted at:

- Railway stations
- Bus stands
- Parcel offices
- Courier hubs
- Transport godowns

##### B. Focus areas:

- Suspicious baggage
- Unclaimed parcels
- Frequent consignments

- Repeat senders/receivers

#### 4. Surprise Checks on Houses / Hideouts of Old Offenders

Conduct targeted surprise inspections on:

- Known offenders' houses
- Associates' premises
- Suspected storage points
- Frequently visited hideouts

#### 5. Regular Vehicle Checking

A. Conduct regular vehicle checks on:

- High-risk routes
- Entry/exit points
- Night corridors
- Interstate routes

B. Focus on:

- Two-wheelers
- Private cars
- Goods vehicles
- Public transport carriers

#### 6. Cordon and Search Operations (CASO)

A. Conduct periodic CASO in:

- Slums
- Labour colonies
- High-risk villages
- Urban hotspots
- Rental clusters

B. CASO should focus on:

- Suspect identification
- Search and seizure
- Verification of outsiders
- Offender presence check

#### 7. Regular Checking of Lodges, Home Stays, PG Hostels & Rental Accommodation

Regular inspections to identify:

- Unverified tenants
- Suspicious visitors
- Drug consumption points
- Concealed storage
- Unregistered occupants

**Enforcement work of Tirupati District Police (Till 30-April)**

| <b>Sl. No.</b> | <b>Subject</b>                                         | <b>Total</b> |

| 10             | No.of Sakhi Apps Downloaded                            |              |
| 11             | No. of Places Drones operated                          |              |
| 12             | Stop & Wash                                            |              |
| 13             | Village Visits                                         |              |
| 14             | No. of persons Bound over                              |              |
| 15             | Rowdy sheeters Counselling                             |              |
| 16             | Palle nidra                                            |              |
| 17             | No.of Awareness Programme conducted                    |              |

**B.DETECTION**

Detection must be intelligence-led, technology-supported, and field-driven. Detection Strategy is as follows

1. Identification of peddlers, consumers, suppliers, carriers
2. Mapping hotspots and vulnerable time zones
3. Tracking suspicious movement around schools, colleges, hostels
4. Monitoring transport routes and courier channels
5. Detection of repeat offenders and associates
6. Monitoring suspicious digital payment patterns
7. Detection through covert surveillance and decoy operations

### **C.KEY PREVENTIVE MEASURES**

1.Verification & Securing Presence:- Physical verification of consumers, previously arrested offenders, suspects, repeat offenders, Ex. Convicts, who are involved in NDPS cases.

2.Interrogation & Intelligence Collection:- Systematic interrogation to develop forward/backward linkages.

3.Digital Data Collection

- Collect and analyse:
  - Mobile data
  - Social media
  - UPI transactions
  - Contact networks

4.Lifestyle Monitoring:- Monitor sudden lifestyle changes indicating illegal income.

5.Deployment of Surveillance Teams:- Dedicated surveillance teams for hotspot and offender monitoring.

6.Informer Development:- Continuous development and validation of local intelligence.

7.Action on Suspicious Persons:- Immediate field verification and legal action.

### **D.INVESTIGATION**

Investigation should not stop at seizure and arrest. It must dismantle the entire supply chain. Investigation shall focus on:

1. Source identification
2. Supply chain mapping
3. Forward and backward linkage analysis
4. Financial trail investigation
5. Mobile call data / tower analysis
6. Social media / digital footprint analysis
7. Identification of associates, harbourers, financiers
8. Asset identification and financial profiling
9. Repeat offender linkage analysis
10. District/interstate syndicate mapping

### **III. SURVILLANCE**

#### **1. Need for Continuous Surveillance & Enforcement,**

Effective prevention and detection of NDPS offences require:

- Constant surveillance on previously arrested NDPS accused
- Identification of active peddlers and consumers
- Monitoring financial and banking transactions
- Collection of human intelligence and technical intelligence
- Identification of supply chains and interstate links
- Predictive policing based on crime analytics
- Real-time field level monitoring by police and excise staff

2. Surveillance on Previously Arrested NDPS Accused :- A dedicated surveillance mechanism shall be established on all previously arrested NDPS accused booked by Police and Excise Departments in Tirupati District.

#### **IV. ENFORCEMENT**

The enforcement mechanism should function in a coordinated manner involving:

1) Intelligence collection by developing informant system 2) Surprise checks on trains, buses, parcel and courier services 3) Surprise checks on houses/ hideouts of old Offenders 4) Regular Vehicle check, 5) Cordon and Search Operations 6) Lodge, mutt, home stays PG hostels list out and regular check, 7) Maintaining a huge database of the drug criminals with a Web application and constant Technical Surveillance on old, repeat offenders.

**1.Enforcement Mechanism:** - To effectively curb ganja peddling and NDPS related crimes in Tirupati District, the enforcement mechanism shall function in a coordinated, intelligence-driven, technology-supported, and field-oriented manner. The objective of enforcement shall not be limited to seizure and arrest alone, but to identify, monitor, disrupt, and dismantle the complete drug supply chain from source to street-level consumer.

This enforcement framework shall be implemented through close coordination among:

- District Police
- Special Branch (SB)
- Excise Department
- Eagle Teams
- Anti-Drug Teams
- Local Intelligence Units
- Cyber & Technical Surveillance Teams

Each unit shall function with defined operational roles under a unified district NDPS enforcement strategy.

**2.Intelligence Collection by Developing Informer Network:-** Human intelligence is the backbone of NDPS enforcement. Since ganja peddling is largely carried out through covert interpersonal networks, timely and actionable intelligence is critical for successful detection and prevention.

Objectives

- Identify peddlers, suppliers, transporters, financiers, and consumers
- Gather advance information on supply movement
- Detect new peddling points and emerging drug hotspots
- Identify hidden storage points and concealment methods
- Monitor movements of habitual offenders

**3. Informer Development Strategy:-** A robust informer network shall be developed at police station level by SHOs, SB staff, and field intelligence personnel.

Informers may be cultivated from:

- Auto and taxi drivers
- Parcel and courier delivery staff
- Railway and bus station workers
- Hostel owners and caretakers
- Lodge staff
- Students and youth contacts
- Local shopkeepers
- Slum informers
- Habitual consumers
- Reformed offenders
- Watchmen and private security guards

Action Points

- Each SHO shall maintain a confidential informer register
- Beat staff shall identify local sources in vulnerable areas
- SB shall develop high-value informers for interstate and organized syndicates
- Informers shall be rewarded for credible and actionable inputs
- Identity of informers shall be strictly protected
- False informers and misleading sources shall be filtered out through verification

A reward-based informer cultivation system is essential for sustained intelligence flow.

**4. Surprise Checks on Trains, Buses, Parcel & Courier Services:-** Public transport and parcel logistics are major channels used for transportation of ganja and narcotic substances. Surprise checks on these transport systems are essential to detect supply movement.

a. Vulnerable Channels

- APSRTC buses

- Private buses
- Interstate buses
- Passenger trains
- Railway parcel offices
- Bus parcel services
- Private courier agencies
- Goods transport services
- E-commerce delivery channels

b. Operational Strategy

- Conduct surprise checking at railway stations, bus stands, and transport hubs
- Deploy plainclothes teams at major transit points
- Monitor suspicious luggage, parcels, and unattended baggage
- Check consignments booked under fake names or incomplete addresses
- Verify frequent parcel receivers and suspicious repeat consignments
- Identify unusual delivery patterns to lodges, hostels, and rented premises

c. Role of Units

- SB to generate transit intelligence
- Eagle Teams to conduct mobile interception
- Excise to track known transport channels
- Local Police to conduct route-based checking

Special attention shall be given to Tirupati Railway Station, APSRTC Bus Stand, Renigunta transit routes, and private logistics operators.

**5.Surprise Checks on Houses / Hideouts of Old Offenders :-** Previously arrested NDPS offenders often continue illegal activity through concealed operations from houses, rented rooms, farmhouses, and temporary hideouts.

a. Objectives

- Detect reactivation of old offenders
- Identify hidden stock points
- Prevent re-establishment of local distribution networks
- Detect harboring of absconding accused

b.Operational Measures

- Prepare list of all old and repeat offenders
- Identify their residences, rented houses, associate houses, and known hideouts
- Conduct periodic surprise checks and verification
- Check suspicious rooms, terraces, godowns, and backyards
- Verify frequent visitors and unusual movement
- Monitor suspected locations through local intelligence

### c. Special Focus

- Repeat offenders
- Bail accused
- History sheeters under NDPS watch
- Recently released offenders
- Accused with unexplained financial growth

Such checks must be intelligence-based, legally supported, and properly documented.

**6. Regular Vehicle Checking:-** Vehicles are widely used for transportation, delivery, and street-level supply of ganja. Regular vehicle checking is essential for interception of transport movement.

#### a. Target Vehicles

- Two-wheelers used by local peddlers
- Autos used for local delivery
- Private cars
- Goods carriers
- Tourist vehicles
- Interstate vehicles
- Parcel vans
- Ride-sharing vehicles used for delivery

#### b. Operational Strategy

- Conduct regular vehicle checks at vulnerable entry and exit points
- Focus on suspicious movement during night hours
- Check concealed cavities, modified compartments, and luggage carriers
- Verify vehicle ownership and travel pattern
- Use mobile checking teams on surprise routes
- Intercept vehicles based on technical and human intelligence

#### c. Vulnerable Points

- District entry points
- Highway junctions
- Renigunta corridor
- Chandragiri route
- Urban bypass roads
- Educational institution zones

Vehicle checking must be intelligence-backed and not merely routine.

**7.Cordon and Search Operations (CASO):-** Cordon and Search Operations are effective in identifying hidden peddlers, consumers, contraband storage, and local distribution networks in vulnerable areas.

a. Objectives

- Flush out peddlers and consumers
- Recover hidden contraband
- Identify suspicious persons
- Collect local intelligence
- Establish police dominance in vulnerable areas

b. Target Areas

- Slums
- Suspected colonies
- Railway surroundings
- Isolated localities
- Rental clusters
- Labour colonies
- Student concentration zones
- Repeat offender localities

c. Operational Procedure

- Seal entry and exit points
- Conduct simultaneous house-to-house checks
- Verify suspicious occupants
- Check identity of tenants and visitors
- Search suspected rooms and storage points
- Detain suspicious persons for verification
- Use drug detection kits where required

CASO shall be conducted periodically in identified hotspots and repeat offender zones.

**8.Regular Checking of Lodges, Mutts, Home Stays, PG Hostels & Rental Accommodation :-** Temporary accommodation facilities are frequently misused for sheltering peddlers, storing narcotics, and facilitating consumption.

a. Vulnerable Locations

- Lodges
- Mutts
- Dharamshalas
- Home stays
- PG hostels

- Private hostels
- Rental rooms
- Budget hotels
- Guest houses

b. Enforcement Measures

- Prepare a complete database of all such establishments
- Verify ownership, staff, and occupant records
- Check compliance with guest identity verification
- Inspect suspicious rooms and frequent short-stay occupants
- Identify repeat visitors and suspicious bookings
- Monitor student and transient occupancy patterns
- Verify foreign and interstate occupants where necessary

c. Objectives

- Prevent use of such places as drug shelters
- Detect storage and consumption points
- Identify peddlers operating through temporary accommodation
- Prevent harbouring of absconders

Regular surprise inspections shall be carried out by local police with SB inputs.

**9. Creation of Integrated Drug Criminal Database with Web Application & Technical Surveillance** :- A district-wide digital enforcement ecosystem is essential for sustained NDPS control.

a. Objective:- To build a centralized intelligence and enforcement platform for continuous monitoring of drug offenders, consumers, repeat accused, and supply networks.

b. Core Components:-

A. Centralized Drug Offender Database

- The database shall contain:
  - Accused profiles
  - Arrest history
  - Excise and police case linkage
  - Associates and network mapping
  - Mobile numbers and IMEI details
  - Bank accounts and UPI IDs
  - Social media accounts
  - Vehicle details
  - Property and asset details
  - Consumer linkages

- Known routes and hideouts

B.Web Application:- A centralized web-based platform shall be developed for:

- Offender profiling
- Field intelligence entry
- Digital interrogation records
- Crime mapping
- Network analysis
- Repeat offender alerts
- Absconder tracking
- Enforcement dashboards
- SHO-wise monitoring

#### C.Mobile Application

Field officers shall use mobile app for:

- Instant offender verification
- Live field updates
- GPS tagged surveillance reports
- Photo/video upload
- On-spot interrogation data capture

#### D.Technical Surveillance

Continuous technical surveillance shall be maintained on:

- Old offenders
- Repeat offenders
- Bail accused
- Suspected reactivated peddlers

This shall include:

- Mobile number analysis
- CDR analysis
- IMEI tracking
- Geo-location pattern analysis
- Social media monitoring
- Telegram/WhatsApp intelligence
- Digital payment analysis
- Financial transaction monitoring

#### E.Predictive Policing

The system shall generate:

- Hotspot alerts
- Repeat offender prediction
- Route risk indicators
- Emerging peddling zone alerts

➤ Consumer clustering patterns

This will shift enforcement from reactive policing to predictive and preventive policing.

The enforcement against ganja peddling and NDPS crimes in Tirupati District must be intelligence-led, technology-enabled, field-focused, and continuously monitored. Random and isolated enforcement actions will not produce lasting impact. A structured enforcement mechanism integrating human intelligence, field operations, technical surveillance, offender databases, and predictive policing is essential to dismantle the drug ecosystem in the district.

Only sustained, coordinated, and data-driven enforcement can effectively suppress the NDPS menace and prevent the growth of organized drug networks in Tirupati District.

## **V. KEY MEASURES**

### **1.Verification & Securing Presence of :**

- All previously arrested accused shall be periodically verified by concerned SHOs.
- Their present address, occupation, associates, and mobile numbers shall be updated regularly.
- Habitual offenders and suspects shall be summoned periodically for enquiry and counselling.

### **2.Interrogation & Intelligence Collection**

- Detailed interrogation shall be conducted to collect:
  - Source of ganja supply
  - Transport routes
  - Financial handlers
  - Local consumers and peddlers
  - Communication methods
  - Storage locations
  - Courier and online delivery methods

### **3.Digital Data Collection :-**

All information collected shall be entered into a centralized Google Sheet/database including:

- Personal details
- Photograph
- Aadhaar details
- Mobile numbers
- Vehicle details
- Bank accounts
- Associates network
- Criminal history
- Social media accounts
- Frequently visited places
- Consumption habits
- Financial profile

### **4.Lifestyle Monitoring**

Regular watch shall be maintained on:

- Sudden increase in wealth
- Suspicious travel
- Frequent association with known offenders
- Lavish lifestyle without legitimate income
- Movement near educational institutions and vulnerable areas

## 5. Deployment of Surveillance Teams

The following units shall continuously monitor NDPS suspects:

- SHOs
- Beat staff
- SB staff
- Eagle Teams
- Special enforcement teams
- Informer network

## 6. Informer Development

A strong informer network shall be developed among:

- Auto drivers
- Hostel owners
- Courier staff
- Students
- Local residents
- Habitual consumers
- Small peddlers

Suitable rewards and incentives may be provided for credible information leading to seizure and arrest.

## 7. Action on Suspicious Persons

Any previously arrested accused found indulging in suspicious activities, unexplained movements, or repeated association with peddlers shall be:

- Picked up for enquiry
- Interrogated thoroughly
- Technically monitored
- Legally proceeded against wherever evidence exists

### a. Monitoring of Consumers

- Random Consumer Checking

### b. Special drives shall be conducted in:

- Educational institutions surroundings
- Hostels
- Lodges
- Isolated public places
- Tourist areas
- Bus stands
- Railway stations
- Rental rooms

Drug detection kits/test kits shall be utilized during raids and checking.

c. Action on Positive Cases

Persons testing positive shall be:

- Interrogated to identify supply sources
- Profiled and documented
- Counselling and monitored
- Linked to de-addiction mechanisms wherever necessary

The following information shall be collected and entered into the database:

- Source of procurement
- Frequency of consumption
- Payment methods
- Supplier details
- Peer group
- Digital payment details
- Telegram/WhatsApp group involvement

d) Creation of Integrated NDPS Database System :- A comprehensive district-level NDPS intelligence database shall be maintained for effective monitoring and predictive policing.

e. Database Contents

The database shall contain:

- NDPS accused details
- Arrest history
- Consumer profiles
- Associates network
- Financial transactions
- Mobile numbers & IMEI details
- Vehicle information
- CDR analysis
- Social media links
- Bank accounts
- Interstate connections
- Crime mapping
- Repeat offender indicators

## **VI. DEVELOPMENT OF WEB APPLICATION & MOBILE APPLICATION :-**

A dedicated NDPS Monitoring & Intelligence Management System may be developed for Tirupati District Police and Excise Department.

### **Proposed Features**

#### **1. Centralized Digital Monitoring**

- Real-time offender database
- History sheet management
- Digital interrogation forms
- Live updates from field officers

#### **2. Mobile App for Field Staff**

- Instant data entry
- Accused verification
- Photo upload
- GPS tagged surveillance reports
- Quick search of offenders

#### **3. Technical Surveillance**

- Mobile number analysis
- IMEI tracking
- Geo-location analysis
- Social media monitoring
- Telegram/WhatsApp intelligence inputs

#### **4. Banking & Financial Analysis**

- Monitoring suspicious transactions
- UPI/payment wallet analysis
- Identification of financiers
- Tracking money flow in NDPS network

#### **5. Chain of Command Analysis**

The system should identify:

- Suppliers
- Transporters
- Local peddlers
- Consumers
- Financiers
- Interstate links

This will help in dismantling the entire drug network instead of merely arresting street-level peddlers.

## 6. Predictive Policing

Using analytics and historical data, the system can:

- Identify hotspot areas
- Predict repeat offenders
- Detect emerging peddling zones
- Generate risk alerts
- Support preventive detention proposals

## 7. Dashboard & Reporting

The application shall provide:

- Mandal-wise analysis
- Police station-wise trends
- Repeat offender list
- Absconding accused list
- Seizure analysis
- Monthly enforcement reports

## **VII. EXPECTED OUTCOMES**

Implementation of the above surveillance and enforcement system will help in:

- Effective suppression of ganja peddling
- Identification of organized drug networks
- Better coordination between Police & Excise
- Reduction in youth drug addiction
- Improved intelligence gathering
- Scientific investigation and analysis
- Strengthened preventive policing
- Real-time monitoring of offenders
- Early identification of emerging NDPS threats

## **VIII. CONCLUSION**

The menace of ganja peddling and NDPS related crimes poses a serious threat to society and public safety in Tirupati District. Mere registration of cases and arrests alone are insufficient to eradicate the problem. A technology-driven, intelligence-based, and continuously monitored enforcement strategy is essential. Hence, establishment of an integrated surveillance system, combined with strict enforcement, technical monitoring, financial analysis, informer development, and predictive policing, is urgently required to effectively combat NDPS related activities and protect the youth and public from the growing drug menace in Tirupati District.
